# Michigan Statewide Survey

State Innovation Exchange

*Key Findings from Democracy and Voting Reform Research*

*Prepared by Ben Lazarus and Gabby Weisberg*

*June 2019*

# Methodology

TargetSmart designed this multi-modal survey. Five-hundred interviews were conducted via professional telephone agents (330 wireless respondents, 170 landline respondents) from May 14-23, and 509 interviews were conducted online among panelists who were matched to the TargetSmart voter file from six opt-in panel providers from May 5-23. All respondents indicated they were 18 years or older and registered to vote in Michigan. Quotas were designed to reflect the demographic and geographic distribution of registered voters in Michigan. The data were weighted by gender, age, race, TargetSmart Partisan Score, TargetSmart High School Only Score, and region by county and county council district to ensure an accurate reflection of the population.

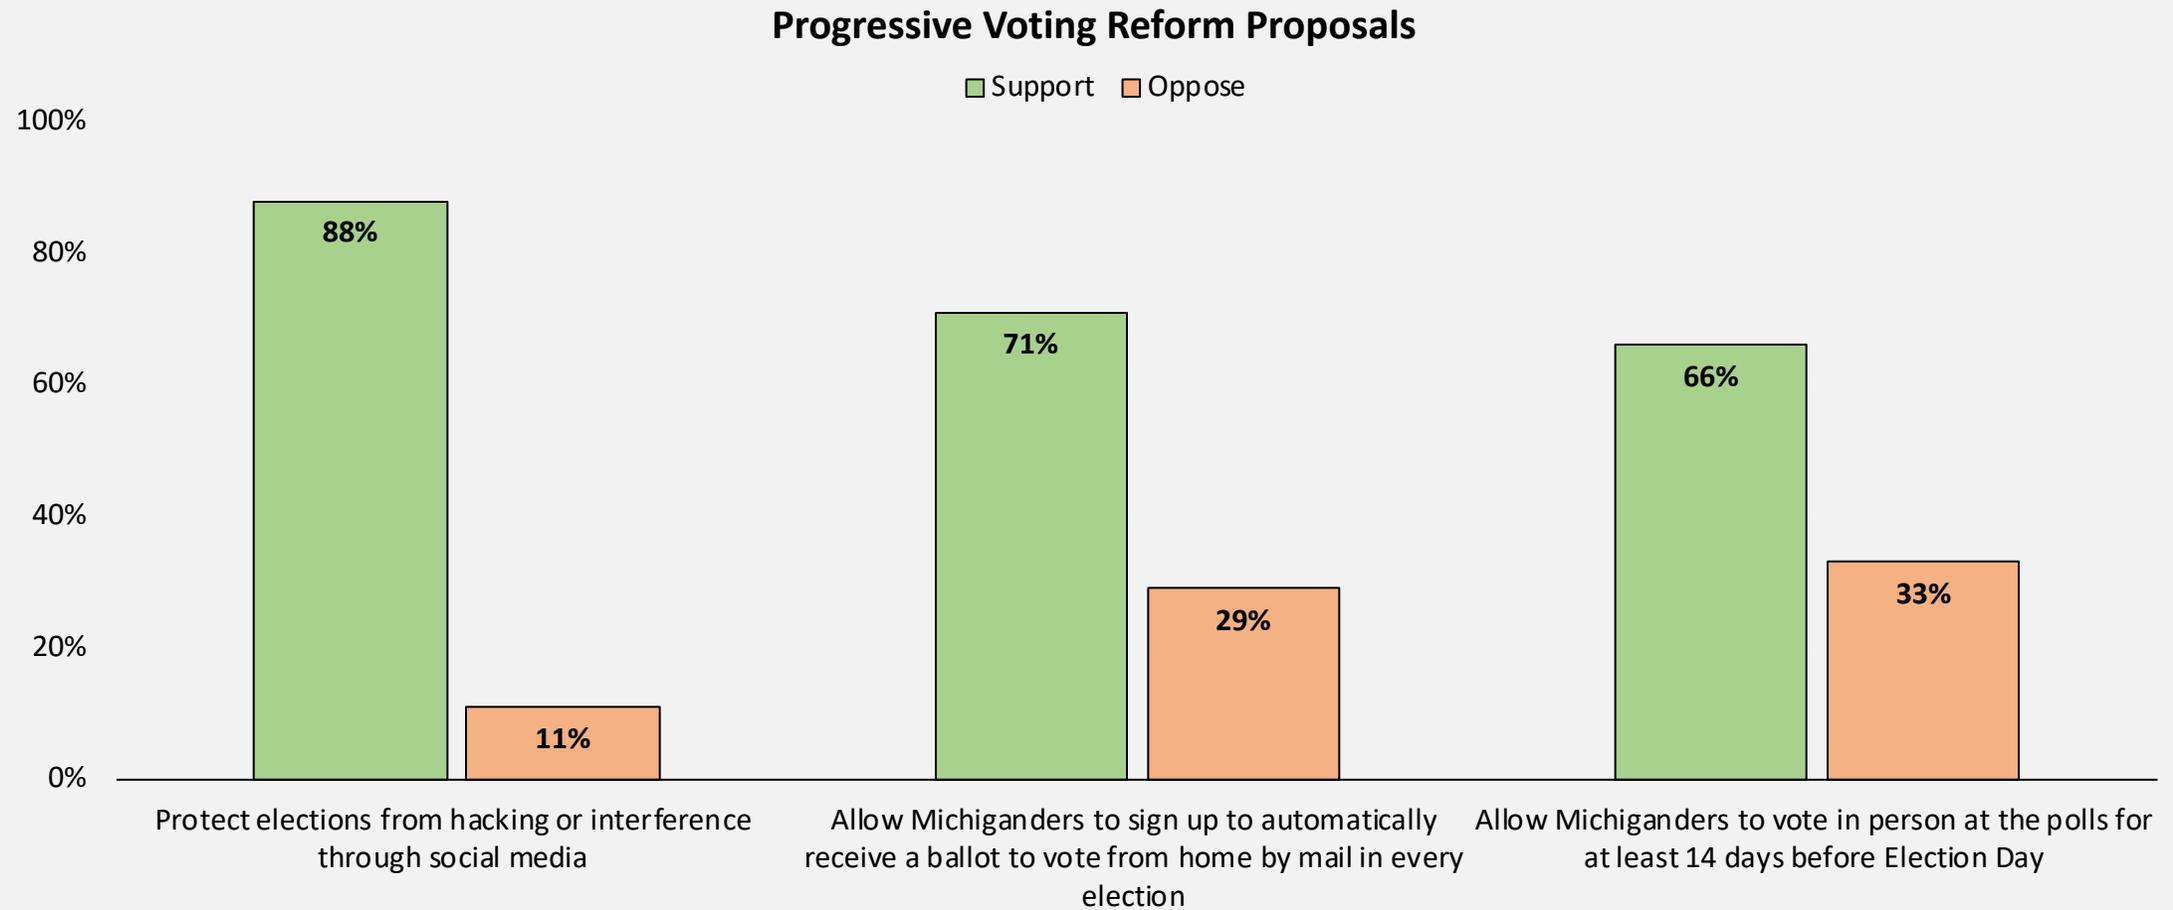

The margin of error for the phone data collected is +/- 4.4%. The margin of error for subgroups is larger and varies. No margins of sampling error are calculated for the online data collection, as this statistic is only applicable to fully randomly sampled surveys, which this survey is not due to its reliance on non-representative opt-in panels. Percentage totals may not add up precisely due to rounding.

# Key Takeaways

- Michigan voters are overwhelmingly supportive of proposals that increase voting accessibility, including automatic vote by mail and 14-day in-person early voting.
- At the same time, voters express intense concerns about election security and want to see protections against hacking and interference put into place.
- Voters strongly support policies that increase transparency in state government, crack down on corrupt politicians, and remove the gnawing influence of big money from the system.
- From reigning in lobbyists and special interests to increasing government transparency, Michigan voters want to reduce corruption and increase accountability in state government.
